

# HIV Screening Available

## HIV Facts

- HIV can be transmitted through unprotected sex, sharing needles and other blood-to-blood contact, and from a mother to her baby
  - HIV is NOT curable, but is treatable
- If left untreated, HIV can build up in your body over time, leading to AIDS
  - Many people have little or no HIV symptoms

If you are concerned that you have been exposed to HIV, please call the number below:

**Cassie, HIV Educator**  
**419-228-4457 ext. 131**

An HIV screening can be done over the phone. If you are considered high-risk for HIV exposure, a free test can be scheduled.
